AER GATOR

Northstar Soil AerGators are designed to aerate, renovate, and assist in over seeding crops. These rugged built aerators are equipped with Pin Adjustable Swing Arms that easily change roller angles to vary the degree of aeration or cultivation. Northstar Soil Aerators are built to last!

WHY YOU NEED A NORTHSTAR AERGATOR:

- Eliminates water runoff minimizing soil erosion
- Maximize water retention & absorption
- Reduces soil compaction
- Increases grass & hay production
- Fractures soil up to 7"
- Efficient utilization of fertilizer
- Ideal for pulling chain harrows to assist in incorporating compost in hay fields and helping remove weeds and grass

Aeration - the Most Important Tool to Improve Pasture and Hay Production!

NORTHSTAR SOIL AERATORS

Heavy Duty Trunion Bearings

C Flex w/ Austempered Iron Tines

Optional Pull Type Wheel Kit

FEATURES:

- Heavy duty constructed frame with Cat. 3, 3-Point hitch
- Rollers are pin adjustable to vary the degree of aeration or cultivation
- C Flex springs with depth stops and lanyard
- Heavy duty roller assemblies with 2" shaft on HD trunion type bearings
- 8" austempered cast iron tines, 7.5" spacing, 4 tines per row
- Weight trays for adding additional weight
- Lighting Kit - Standard

MODEL	DESCRIPTION	TINE	HP	WEIGHT
AR-1000	10' Straight Frame	64	60-100	2200 lbs.
AR-1250	12.5' Straight Frame	80	75-125	2600 lbs.
AR-1500	15' Straight Frame	96	90-150	3100 lbs.
