

Compact Spreaders

**NO MORE WHEELBARROWS!
NO MORE SMELLY MANURE PILES!**

**RECYCLED NUTRIENTS
IMPROVE PASTURES**

Clean stalls
in **half the time!**

World's Only
STAINLESS STEEL
Compact Manure Spreader!

MillcreekSpreaders.com

The FIRST company to build compact manure spreaders. The ONLY company to build them out of stainless steel.

Clean stalls in half the time –

Now you can take the heavy lifting and hard work out of stall cleaning

Dread stall cleaning? That heavy wheelbarrow is so hard to push, and even harder to maneuver out of the barn. Then the mighty backbreaking heave to dump it on the pile. That stinky old fly-infested manure pile!

FORGET ALL THAT – Here's a better way!

Your garden tractor, ATV or utility vehicle pulls a Millcreek Spreader right to the stalls. Or, easily push the Spreader using our exclusive Dolly Wheel Jack Stand.™ With this feature you never have to lift the spreader to move it, even when fully loaded. No need to filter out hay or straw because our spreader handles it all.

With the Spreader attached to your vehicle, you drive to the field or pasture, engage the Feather Touch Levers™ and presto, you're recycling natural fertilizer. Better yet, you're done with your stall cleaning chores in less time – leaving you more time to enjoy your horses!

NO wheelbarrow!

NO aching back!

NO manure piles!

**Less time cleaning...
more time with
your horse.**

“ This Spreader is just awesome. Built like a rock and works just great! It arrived in excellent condition and was up and running in no time! ”

“ Very impressive workmanship! I was impressed from the moment I saw it, from the crate it came on, to the welds and the finish work on all parts of the spreader. It also works flawlessly. ”

“ We live in Florida so we bought the stainless steel model because of our hot and humid weather. The spreader is excellent! ”

We've made the

BEST^{even} BETTER!

The Millcreek SS... a true innovation in manure spreaders!

What does a stainless steel (Type 304) body mean? It means no more rust through.

The new Millcreek SS body is guaranteed not to rust through for LIFE!

You'll get worry-free operation, heavy-duty service and durable construction. There's nothing else like it!

Compatible with a wide
range of tow vehicles

Lower, flared sides
for easy loading
3" - 7" lower than all other
spreaders on the market

Poly-Vinyl
Floorboards
will never rot
or corrode

Dolly Wheel Jack Stand

With this feature you never have to lift the Spreader to move it. A gentle push is all it takes even when loaded.

Stainless Steel Beaters
Along with stainless steel chains and slats, won't wear down, rust or corrode

What's missing? Grease points!

Millcreek is the first and only spreader manufacturer to offer sealed bearings. A little oil on the drive chain every few months and you're good to go. Save time, and wear and tear on your machine!

27: Compact Spreader

28 cubic feet, or 22.5 bushel capacity

For Up To 4 Horses

The world's most popular equine spreader since 1985, the Millcreek Model 27+/ss blazed the trail to faster and easier stall cleaning. It's ideal for the smaller barn. Easy, simple and almost effortless to use.

Model 27+

- ✓ Ground Drive (forward motion powers spreading action)
- ✓ High-traction tires work in almost all conditions
- ✓ Industrial powder coat finish
- ✓ T-Link apron chain
- ✓ No-rot, no-rust poly floor

Pick Your Model
Millcreek Spreaders feature our popular standard models, plus options that allow you to customize to fit your needs.

Dolly Wheel Jack Stand
With this feature you never have to lift the Spreader to move it. A gentle push is all it takes even when loaded.

Stainless Steel Chain and Slats
No more rust or corrosion. A lifetime of heavy-duty service.

Model 27ss

Model 27+ Features Plus:

- ✓ Type 304 brushed stainless steel construction
- ✓ Dolly wheel jack stand and endgate included

"I like Millcreek's quality, the lower sides and the dolly wheel. I was amazed at the customer service, too! Thank you for a fantastic product."

Gigi Gilbert Berry, Concord, NC

37: Compact Spreader

37 cubic feet, or 30 bushel capacity

For Up To 6 Horses

A "stretch" version of the Model 27+ that's two feet longer and has all the high performance features you expect from Millcreek. The longer bed means the Model 37+/ss handles a larger load to make stall cleaning easier for stables with up to 6 horses.

Model 37+

- ✓ Ground Drive (forward motion powers spreading action)
- ✓ High-traction tires work in almost all conditions
- ✓ Industrial powder coat finish
- ✓ T-Link apron chain
- ✓ Jack stand comes standard
- ✓ No-rot, no-rust poly floor

Stainless Steel Beaters
These beaters will not wear down, rust or corrode. There's nothing else like them.

Model 37ss

Model 37+ Features Plus:

- ✓ Type 304 brushed stainless steel construction
- ✓ Dolly wheel jack stand and endgate included
- ✓ Stainless steel T-Link apron chain

57: Mid-Size Spreader

56 cubic feet, or 45 bushel capacity

For Up To 10 Horses

Now you're stepping up to a small farm-sized manure spreader. Our Model 57 features heavy gauge steel, farm-tough construction and comes with your choice of Ground Drive (forward motion powers spreading action) or PTO (Power Take-Off) Drive to work with tractors.

Model 57

- ✓ No-rot, no-rust poly floor
- ✓ T-Link apron chain
- ✓ Rugged farm-grade steel construction
- ✓ Industrial powder coated finish
- ✓ Flared sides for easier loading
- ✓ Ag-traction tires for ground drive
- ✓ Ribbed tires for PTO

Model 57ss

Model 57 Features Plus:

- ✓ Rugged farm-grade stainless steel construction
- ✓ Stainless steel T-Link apron chain
- ✓ Type 304 brushed stainless steel construction

77: Mid-Size Spreader

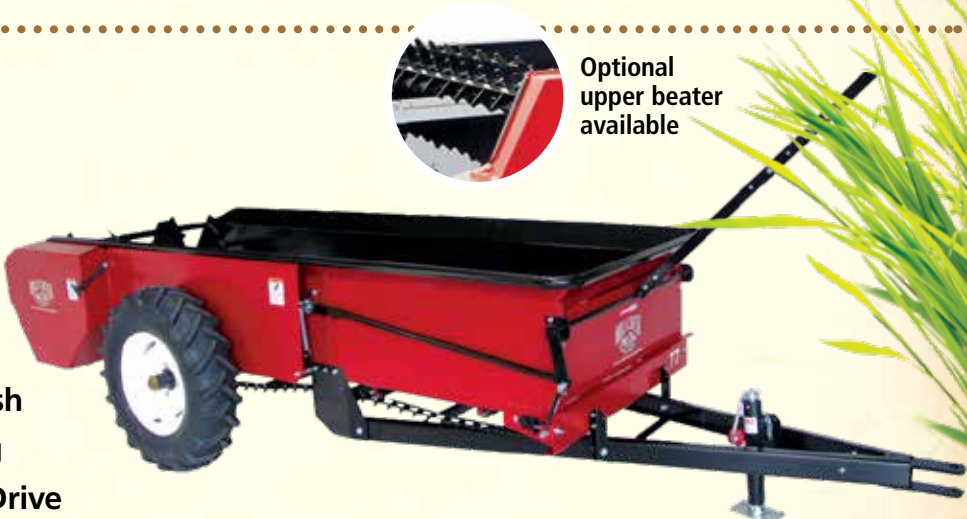

72 cubic feet, or 58 bushel capacity

For Up To 20 Horses

The Millcreek Model 77 features heavy gauge steel, farm-tough construction and comes with your choice of Ground Drive (forward motion powers spreading action) or PTO (Power Take-Off) Drive to work with tractors. It's ideal for large stables, small dairy farms and spreading bulk materials like wood chips.

Model 77

- ✓ No-rot, no-rust poly floor
- ✓ T-Link apron chain
- ✓ Rugged farm-grade steel construction
- ✓ Industrial powder coated finish
- ✓ Flared sides for easier loading
- ✓ Ag-traction tires for Ground Drive
- ✓ Ribbed tires for PTO

Model 77ss

Model 77 Features Plus:

- ✓ Stainless steel T-Link apron chain
- ✓ Type 304 brushed stainless steel construction

97: Full-Size Spreader

109 cubic feet, or 77 bushels

For More Than **20+ Horses**

This heavy-duty workhorse is one of the largest spreaders in the Millcreek line up. The Model 97 features heavy gauge steel, farm-tough construction and comes with a PTO-driven power train. The low profile makes for easy loading, and the optional hydraulic endgate is controlled from the tractor seat. Ideal for large stables, small dairy farms, spreading manure in many kinds of livestock operations and for spreading bulk materials like wood chips.

Optional upper beater available

Model 97

- ✓ No-rot, no-rust poly floor
- ✓ T-Link apron chain
- ✓ Rugged farm-grade steel construction
- ✓ Industrial powder coat finish
- ✓ Flared sides for easier loading
- ✓ Ribbed tires for PTO

"Best thing about my Millcreek spreader: it affords me more time in my day. Anything we can do to get in and out of our two barns is a great help. The spreader just makes life easier!"

Julia MacDougall, Sparkle Plenty Ranch, SanTan Valley, AZ

Model 97ss

Model 97 Features Plus:

- ✓ Rugged farm-grade stainless steel construction
- ✓ Stainless steel T-Link apron chain
- ✓ Type 304 brushed stainless steel construction

Optional upper beater available

127: Full-Size Spreader

140 cubic feet, or 113 bushel capacity

For More Than **25+ Horses**

This is the top of the Millcreek mountain of professional grade manure spreaders for equine and small dairy applications. You get farm-tough construction with heavy gauge steel and quality craftsmanship you've come to expect with Millcreek products. High sides for extra capacity, reliable PTO power train, and upper beater for high efficiency spreading make Model 127 a perfect solution for busy small farms.

Model 127

- ✓ No-rot, no-rust poly floor
- ✓ T-Link apron chain
- ✓ Rugged farm-grade steel construction
- ✓ Industrial powder coated finish
- ✓ Flared sides for easier loading
- ✓ Standard upper beater
- ✓ Ribbed tires for PTO

Upper beater is standard

127 DELUXE RHINO LINING

Model 127ss

Model 127 Features Plus:

- ✓ Stainless steel T-Link apron chain
- ✓ Type 304 brushed stainless steel construction
- ✓ Standard stainless steel upper beater

Upper beater is standard

Options

Endgate - Our Most Popular Option!

A gate that swings down across the end of your spreader, giving you more capacity without anything spilling out the back. When you're ready to spread, just flip it up and it can also act as a deflector to keep manure from flying forward.

Fines Pan

A pan that hangs off the back edge of the unit, catching the small amount of manure that may trickle out without hitting the beater. We suggest this if you're spreading any type of pelleted bedding, or if you're spreading on a residential lawn.

Upper Beater

The upper beater will give you more shredding power when dealing with heavy, wet manure, or if you have a lot of hay or straw mixed in. We especially suggest this with cow or pig manure.

Stainless Apron Chain

Upgrade to our stainless steel apron chain if you don't want to worry about any rust or corrosion. This chain will literally last the lifetime of your spreader!

The Millcreek Difference

No other compact spreader is made like a Millcreek, even if they happen to look pretty much the same. The difference is the engineering, the materials and the craftsmanship built in to every unit.

We introduced the labor-saving compact manure spreader to horse lovers all the way back in 1985. Millcreek has been the leading name in quality spreaders ever since.

Another difference is that we use the Millcreek Spreaders we make. We're horse lovers and we clean stalls just like you do. So we know first hand what it takes to make the job easier. That adds up to a difference in quality and long term value you just won't find elsewhere.

Our standard Millcreek Warranty means peace of mind.

At Millcreek, we offer a 3-year full coverage warranty on all parts included on your spreader. If a part breaks or malfunctions, simply give us a call & we'll replace it free of charge. The optional urethane/rhino lining is guaranteed to be free of defects in materials for 10 years. Our poly floor is guaranteed against rust, rot, corrosion, or other material failure for the lifetime of your spreader.

*please note the following models have a galvanized steel floor, not a poly floor, and do not include a lifetime warranty on the floor: model 15, 22, 29, 36.

Our unique Millcreek SS Warranty is unequaled in the industry.

With a Millcreek SS Warranty, in addition to our full coverage protection outlined above, plus our lifetime warranty on the poly floor, we guarantee our stainless steel bodies for life against any rust damage - unlike any other compact spreader on the market.

BEST IN CLASS

Millcreek sets the industry standard for high quality, top value compact spreading equipment. Our Spreaders are engineered and made with the horse lover in mind. Since 1985 we have consistently responded to customer feedback to make Millcreek Spreaders the best in the equine world. Just ask anyone who has one.
