

# SPRAY BOOMS

**BB Series Spray Boom** mounts directly to the tractor's front bolster, or a front or rear 3-point hitch. Telescopic tubes with hydraulic cylinders allow variable width settings and are spread evenly with a 50/50 flow divider. Available with 14" or 24" wind proof polypropylene or clear lexan spray heads which feature spring break away protection against obstacles. Parallel floating arms allow spray heads to float independently to follow uneven terrain. Retraction of hydraulic cylinders raises spray heads for transport.

MODELS	DESCRIPTION	WEIGHT
BB609	Adjustable double row spray boom 6'-9' (consist of BB710 and two BB50/14/1)	265
BB710	Adjustable double row spray boom 7'-10' (less spray heads)	290
